11.0.0 (Build 101)	New release that support with Microsoft SQL Server 2005, 2008 and 2012.	18 th January 2013
10.1.1	<p>Enhancements:</p> <ul style="list-style-type: none"> • Integrate the latest print preview 3rd party controls. • Improve performance 	24 th February 2011
10.1.0	<p>The version number of SQLserverPrint 2008 has deliberately been changed to make sure that the updated registration code algorithm applies. This does mean that existing registration will not work with this version of the product.</p> <p>All existing registered users of SQLserverPrint 2008 should have received an email with the new registration code. If you are a registered user of SQLserverPrint 2008 and did not receive the email notifying you this change then please send an email to support@starprinttools.com requesting new registration code. You must supply your registered user name, and the existing registration code.</p> <p>Bug Fixes:</p> <ul style="list-style-type: none"> • The default value for table/view columns is output from Default instead of default constraint • The Database is refreshed before output is generated • Fix bug that causes extended properties to spill into page 	16 th November 2010

footers

- Suppress printing extended properties that has name starting with “**MS_Diagrams**”
- When the keyboard is used to move up/down the nodes in the options dialog then the right hand side panel is not refreshed with the selected option node.

10.0.8

Bug Fixes:

1st April 2010

- Help file does not display.

10.0.7

Bug Fixes:

26th February 2010

- Fix a bug that causes some output to spill into the page footers.

10.0.6

Enhancements:

13th Jan 2010

An exception in SQLserverPrint 2008 is displayed on a form. There are occasions when multiple exceptions can occur and can be very annoying to the user. This version allows the user to suppress multiple exceptions to be displayed in the same operation (print., preview or export)

Example

If the user does not have sufficient rights to a database then multiple exceptions may occur when previewing, printing or exporting objects in that database. The user can suppress all subsequent popups by checking ‘Do not show this error in the rest of this operation’ checkbox.

10.0.5

Bug Fixes:

2nd Dec 2009

- Menu **File | Preview SQL from Clipboard** on the main application window does not work
- Menu **File | Preview** on the main application window is always disabled
- Incorrect spelling for menu **File | Disconnect**
- Integrate the latest version of print/preview control by ComponentONE

10.0.4

Bug Fixes:

2nd Jun 2009

- The application fails to maintain user preferences if /My Document/ directory is relocated to a network path or has no write permissions.

10.0.3

Bug Fixes:

27th Feb 2009

- An exception occurs when an attempt is used to set option in a non-English operating system locale
- **Paper size** option is not restored after application reload
- **Page orientation** option is not restored after application reload

10.0.2

Functionality Change:

24th Feb 2009

- By default the systems objects will not be loaded in the object browser. Instead a checkbox is provided on the main window (below the Object tree browser) to allow the user to decide if the system objects are to be included in the object browser.

Bug Fixes:

- After outputting extended properties of column names of a table or a View the text colour remains set to the colour set for 'Comments'
- An attempt to Print, preview or export objects while objects preview is in progress results in program exception

10.0.1

- All previous version of SQLServerPrint do not work on computers that have Data Execution Prevention (DEP) security feature enabled. This version that has been designed to work on DEP enabled computers

25th Jan 2009
