

# SQLSERVERPRINT 2019

## Revision History

©2019 StarPrint Limited

### 14.0.1 BUILD 19011

---

5th January 2019

Update to support SQL Server 2008 - 2019

### 13.0.14 BUILD 18011

---

18<sup>TH</sup> JANUARY 2018

#### BUG FIXES

- Print/preview software updated to use the latest editions.
- When objects are selected across multiple database then the {database name} macro in the header/footer outputs the database name of the last database.

### 13.0.12 BUILD 17121

---

5th December 2017

#### BUG FIXES

- Refresh button does not reload SQL Server objects. This means that the updates to SQL Server objects in SQL Server are not shown the SQLserverPrint.  
Multiline comments in scripts are not output.  
Pages header/footer displays n of {Pages} instead of n of m

### 13.0.11 BUILD 17101

---

12th October 2017

#### BUG FIXES

- All script source code lines that end with LF (linefeed) are not nor output as expected

#### ENHANCEMENT

- Product has been enhanced to output Server Agent Jobs

### 13.0.10 BUILD 17071

---

20th July 2017

#### ENHANCEMENT

- A popup is displayed when a newer version of this application is available for download.
- Rendering speed for SQL related to StoredProcedures, triggers and Views etc is improved many times.
