6.26.105	<b>Bug Fixes:</b> <ul style="list-style-type: none"> <li>Macros in the page header/footer are not always substituted</li> <li>Character '&amp;' is output as keyword instead of as text</li> <li>Line labels are output as identifies instead of text</li> <li>Some build-in functions like Trim, left, Right etc are output as keywords instead of identifiers as per VB IDE</li> <li>An exception occurs when version 6.26.104 is used first time</li> <li>Margins work correctly in all regional and language settings</li> </ul>	14 <sup>th</sup> December 2008
6.26.104	<b>Bug Fixes:</b>	1 <sup>st</sup> November 2008

- The following options are not restored between VB IDE reloads:  
General > 'Print Table of Contents (TOC)  
Options > General > Bitmaps > 'print at the end of file'  
Options > Indenting > 'Align EOL Comments in column NN'  
Options > Indenting > 'Column Number'  
Options > Page Setup > General > Borders
- The page borders are drawn with the colour of the connecting lines that makes it difficult to separate the connecting lines from the page borderlines. This version always draws the pages border with dark grey color and '1pt' thickness
- The preview is not updated when 'Connecting lines' checkbox is toggled
- The 'Procedure headers' font setting does not change the fonts for the procedure/function header. The option to set the fonts has been removed in this version as it is not used

- An additional macro variable {Year} has been provided. This can be used to output the year in the page header/footer. For example, you can set a segment of page header/footer as:

**© {Year} StarPrint Limited**

The generated output will show the following in the page/header/footer segment if the output was generated in year 2008:

**© {2008} StarPrint Limited**
